This advance notice will help us serve you better.

Learning Objectives:
At the conclusion of the symposium, the participants should be able to:

- Co-manage and treat glaucoma medically
- Be informed about the surgical options available to patients for the treatment and management of glaucoma
- Co-manage and treat anterior segment disorders with topical as well as systemic medication
- Have a better understanding of the medical advancements, diagnosis and management strategies for retinal pathology in patients with diabetes as well as co-management strategies

Who Should Attend:
Optometrists, ophthalmologists, opticians and any other interested health care professionals.

Needs Assessment:
To obtain the most current information and remain knowledgeable with regards to the latest standards of care in the diagnosis, treatment, and management of various ocular and systemic diseases and subsequently implement this knowledge to provide the highest level of care to our patients within the field of optometry.
